NATURAL STONE

Natural Stone

It is hard to beat the beauty and grandeur of natural stone. Architects, designers, and homeowners that want longevity, eco-friendly design, and unparalleled character choose natural stone for their projects. Natural stone can appear to be more expensive due to the added cost of quarrying, transportation, and skill required in installing it. But when you consider the life of the finished project whether it is a private residence or public plaza, those who make the investment, believe it to be well worth it.

Types of Stone

- Basalt
- Granite
- Marble
- Limestone
- Sandstone
- Slate
- Travertine

Create a Legacy

Buildings, monuments, and hardscapes that leverage natural stone in their composition provide the people who experience them with a calming, emotional connection. Natural stone continues to be the product of creating a legacy.

If you are thinking long term and wish to create a legacy, you'll want to consider using natural stone in your project.

Uses for Stone

- pavers
- stairs
- stair treads and risers
- planks
- coping
- wall caps
- wall cladding
- assemblies including fireplaces, water features, stone benches

NATURAL STONE

Why Buy Stone From HDG?

Stone is the most fluid and flexible building material in the world! The problem with the stone industry historically is that someone at a dealer or distributorship makes decisions about what you the client will want and buys truckloads of tile or slabs in set, standard sizes, and then is charged with selling it to you. That business model is rigid. We flip that model on its head. HDG Building Materials works closely with architects, landscape architects, interior designers, masons, developers and owners. We stock only marketing and sales samples so overhead is low and response time is fast. With our key leaders in construction management experience and design degrees in landscape architecture, HDG Building Materials consults with you on YOUR design, material selection, and the finishes and configurations that will be best-suited to your project. In some cases, we source new materials specifically to match your criteria. We look forward to serving you.

NATURAL STONE

Accessible and Affordable

Many of the traditional finishes and fabrication are still available in other countries. That is where we go. Our resident stone expert, Erik Nelson, lived and worked in China for three years and speaks Chinese. HDG Building Materials has close working relationships with our partner factories and are involved on site during fabrication ensuring three levels of quality inspection. We send course of fabrication photos and reports, and when complete, we arrange all logistics to deliver your order to your job site ready to install.

Turn-key Service Includes:

- Shop drawings by HDG
(approved by you and used for fabrication and QC in the factory)
- Submittal samples & mockups
- Job fabrication & quality control
- Course of fabrication photo reports
 - Detailed packing list
 - Packing and crating
- Logistics and delivery to job site

Colors and Finishes

Natural stone provokes the designers imagination. Its variations in color, patterns, and texture are visually interesting and impossible to replicate in other materials. Whether in the landscape or in a building's architecture texture is what makes stone exciting. Traditional hand crafted and most modern machine finishes are available.

Capable and Experienced

HDG Building Materials provides natural stone working in jobs as small as a single carved bench or fireplace assembly to a 50 container order for an entire plaza. Know that if you can draw it then we can fabricate it and have it shipped to your job site ready to install.

“We worked with HDG Building Materials on one of the most complicated jobs we’ve done in our 40-year history. For the Horton Plaza Improvement project in San Diego we used a variety of shapes and sizes of dimensional stone in various finishes, vertical and horizontal installation methods, and including stairs on a radius. From initially receiving stone samples to visiting a quarry on-site in China, HDG provided great service and inspired confidence.”
