

Providing Architects and Builders with
Superior Paving, Decking and Pedestal Products

Commercial | Luxury Residential | Civic

BLACK LOCUST WOOD PAVERS

Gold Standard of Sustainability

Sourced from sustainable forests in the USA, Black Locust Deck Tiles are made with the strongest and most rot-resistant wood indigenous to North America. Black locust wood is water-resistant, rot-resistant, fire-resistant, extremely durable and stable, and requires little maintenance. Made in the USA.

Black Locust Hardwood Decking Tiles

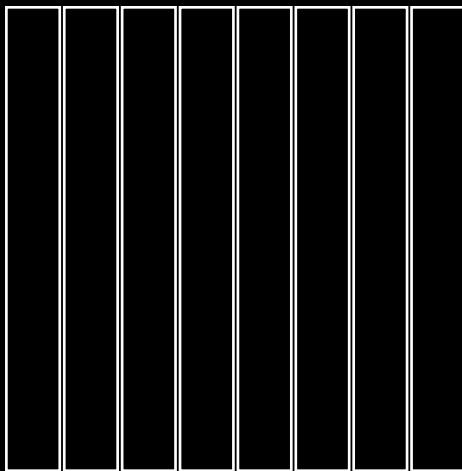

These pre-fabricated deck tiles are constructed from black locust sustainable wood and 305 stainless steel screws. Black locust wood is harder than white oak so it will hold up well in commercial applications with high pedestrian traffic. Projects that use black locust wood enjoy long life spans comparable to projects that use ipe hardwood.

Specifications

- Constructed from Black Locust
- 305 Stainless Steel Screws
- Wood treated with manufacturer-recommended oil on all sides

Model:	BL-8S-SQ
Surface finish:	Smooth
Color:	Initial color is blonde to light red/light brown
Janka Hardness Rating:	1700
Nominal Size:	2' x 2'
Actual Size:	23-7/8" x 23-7/8" x 1-5/8"
Top Slats:	8
Bottom Slats:	3
Slat Profile:	S4S / E6E (1/8")
Weight:	Approximately 21 pounds per 2 x 2 Deck Tile
Weight psf:	5.25 lbs/ft ²
Fire Rating:	Class A (ASTM E84-16 tested)
