HDG Aluminum Resysta Composite

HDG Resysta panels consist of a non-combustible aluminum composite panel which is coated with a Resysta film. The facade fastening is visible and is carried out by approved and color-matched facades crews. This offers an optimal design feature both horizontally and vertically.

Each HDG Panel offers the flexibility for individual requirements. The unique Resysta surface can be prefinished in 30 different colors and leaves no design wish unfulfilled.
