MASSARANDUBA WOOD PAVERS

Beautiful & Low Maintenance

Massaranduba hardwood decking tiles provide decks, terraces, rooftops, green roofs, courtyards, and pathways with the warmth and character of natural wood in velvet red tones. Durable and resistant to mold, rot and decay, HDG Massaranduba Pavers are responsibly harvested from managed forests and only available as FSC-certified products.

Structural Hardwood Decking Tiles

Suitable for both luxury residential and high-traffic commercial applications, HDG Massaranduba Pavers offer exceptional flexibility in landscape design as they can be installed over a joist system or raised pedestals. These commercial grade pavers are assembled with corrosion resistant, heavy duty deck screws and include a kerf cut design for tile attachment to Buzon Pedestals.

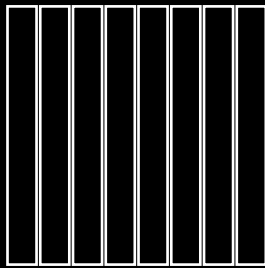

HDG MASSARANDUBA WOOD PAVERS
