

Providing Architects and Builders with
Superior Paving, Decking and Pedestal Products

Commercial | Luxury Residential | Civic

UNIVERSAL ALUMINUM JOIST

Strong. Straight. Stable.

Aluminum joists provide a straight, strong, and noncombustible Class “A” deck framing solution for long-lasting, low-maintenance outdoor spaces. Compatible with nearly any decking material, these joists simplify installation while supporting durable, sleek, and high-performance decks for both commercial and residential projects.

Key Features & Benefits

- **Straight and stable:** won't twist, warp, or sag over time
- **Durable:** impervious to UV, moisture, insects, and rot
- **Pedestal-ready:** integrates with Buzon pedestal system
- **Heavy-load ready:** supports pavers and substantial decking
- **Decking flexibility:** use with wood or composite decking and stone-, wood-, or porcelain pavers.
